

AEROBAR TWO / AEROBAR THREE SETUP SUPPLEMENT GIANT TRINITY ADVANCED PRO (TT/TRI)

The Giant Trinity Advanced Pro basebar requires anti-crush inserts for safe use and a robust connection. These are an OE part that **MUST** be used in all instances.

NOTE: A washer must be used between the head of the bolt and the back side of the basebar. Giant supply a “thick” 1.5 mm washer with the OE basebar assembly. We recommend this “thick” washer, which helps reinforce the interface between the head of the bolt and the basebar.
